SUMMARY

I am a dynamic front-end developer with 1.5 years of practical experience, adept in using various libraries and frameworks to bring web projects to life. With a proven track record in team collaboration, I've contributed to three major projects and led as a Scrum Master twice. Known for my creativity, quick learning ability, and strong responsibility in work, I'm keen on embracing challenging opportunities. Discover more about my professional journey and view my work at **Portfolio**.

HARD SKILLS

HTML5/CSS3 • Responsive/Adaptive Design • JavaScript • REST API • React/Redux • GIT/GitHub • Webpack • Parcel • MongoDB • Fetch API

PROJECT EXPERIENCE

WEBSTUDIO

2022

GIT

The first fully written website in HTML, CSS, JS from scratch. A webstudio where you can find effective solutions for your business, order services, learn about the team that will help you and see the portfolio of offers.

ICE CREAM

2023

GIT

Website of a company that produces ice cream from natural products. We used adaptive layout, modal windows, and functionality for easy navigation and attractive design. HTML, Parcel, CSS, JS were used.

HEALTHY HAB

2023

GIT

Keep track of your health, water and calorie consumption, set a goal and confidently go for it. Use of adaptive layout, modal windows, a full-fledged database with saving and changing user information, the ability to register, attractive and simple design, display of consumption tips based on user data. HTML, module CSS, JS, Redax, React, MongoDB were used.
